

TRIAD GROUP PLC AWARDED PLACE ON GOVERNMENT G-CLOUD II FRAMEWORK

Triad's web-based mapping service awarded a place on Government's new procurement framework

Milton Keynes, UK, 13 November 2012 - Triad Consulting & Solutions' map-based community engagement application has been awarded a place by the Government Procurement Service, on the Government's new G-Cloud ii Framework Agreement. Public sector bodies can now deploy an engaging consultation website in less than a day by procuring Triad's cloud-based service through the CloudStore catalogue.

"Triad is proud to have been awarded this position on the Government's innovative and essential catalogue framework", said Adrian Leer, Commercial Director, Triad Consulting & Solutions. "Our EngageCL service allows Public Sector organisations to rapidly and economically establish an intuitive, interactive and engaging website for public reporting."

Triad's EngageCL service lets local authorities, within a day, deploy a map-based community engagement website. By simply clicking on a map of the district, members of the public can tell you what they think, voice their concerns, volunteer their services or make suggestions. Similarly, local government can update residents about the facilities, projects, initiatives, activities and opportunities where they live.

Marie-Helene Durif, Head of Sourcing & Category Management, at the Government Procurement Service had the following to say about Triad's successful application: "At the Government Procurement Service our priority is to provide procurement savings for organisations across the UK public sector. The inclusion of Triad to the G-Cloud II Framework Programme will strengthen our offering and provide public sector buyers with a tried and tested route to achieve value for money."

EngageCL is one of a range of web-based mapping platforms available from Triad, providing off-the-shelf web-GIS local information systems and advanced community engagement solutions. These platforms also act as the engine behind many bespoke solutions as well as map-driven Web-Part extensions to Microsoft SharePoint.

Triad's G-Cloud services can be found by searching for 'Triad' on the Government CloudStore (<http://gcloud.civilservice.gov.uk/cloudstore/>).

About Triad Consulting & Solutions

Triad Consulting & Solutions (Triad) is part of Triad Group Plc, a UK company listed on the London Stock Exchange.

Triad's principal business activities include bespoke application development, web design and development, COTS product selection and implementation, systems integration, support and maintenance, systems architecture and business analysis.
